

Bob Tianqi Wei

Boston, MA | bobwei@mit.edu | 510-816-2381 | bobtianqiwei.com | github.com/bobtianqiwei

Education

Massachusetts Institute of Technology, Media Laboratory
M.S. in Human-Computer Interaction
University of California at Berkeley, College of Engineering
M.Des. in Human-Computer Interaction
Tsinghua University, Academy of Arts and Design
B.A. in Industrial Design

Aug 2026 – Expected May 2028
Advisor: Prof. Hiroshi Ishii
Aug 2023 – Dec 2024
Distinguished Scholar, 3.66/4
Aug 2019 – Jun 2023
3.71/4

Technical Experiences

- Frontend Engineer, eTopus Technology Inc.** San Jose, CA Oct 2025 – Jun 2026
- Owned UI/UX and frontend delivery for OpSyn, an internal enterprise AI agent, translating Figma design into pixel-accurate production React+Vite UI with responsive layouts, reusable components and consistent typography and spacing
 - Implemented core chat workflows including streaming responses, file uploads, session sharing and feedback modals
 - Built agent trace and citation UX with a source list and inline highlights that surfaces referenced documents and quotes; shipped a feedback loop and fixed API integration to persist feedback and reflect submission state in UI
 - Designed and shipped hierarchical KPI and robotics debug dashboards, defining navigation and page layouts from high level overviews to drill down views
- Frontend Engineer, Create, Inc.** Contract, San Francisco, CA Jul 2025 - Sep 2025
- Shipped high-fidelity marketing sites supporting the launch of [Anything](#), Create's new AI app builder, collaborating closely with design and founding team: [Site](#), [Affiliate Program](#), [Brand Resources](#)
 - Converted Figma specs into pixel-accurate, responsive React UI with TypeScript; established reusable components, fluid spacing/typography, and design token aligned styling for multi breakpoint layouts
 - Refined internal AI agent pipelines for *Anything*, designing prompts that translate user-submitted images into code
 - Contributed to QA of an unreleased product line, focusing on UI quality and UX consistency
 - Helped the launch story and site quality that supported revenue growth to \$1M ARR in Q3 2025.
- Research Engineer, Berkeley Institute of Design Lab, UC Berkeley EECS, Part-Time** Nov 2023 - Jan 2026
- Developed [ArtiFactor](#), an AI-powered creative workflow platform integrating multi-agent orchestration, LLMs, and multimodal ML models to support intelligent content generation and analysis
 - Designed a semantic knowledge base system with vector embeddings. Architected full-stack systems using React, Node.js, and Python Flask microservices, with real-time agent triggering, workflow automation, and Dockerized ML backends
 - Collaborated with designers, engineers and researchers to bridge AI/ML capabilities with intuitive UX

Projects

- PartSelect Chat Agent - AI Agent for E-Commerce Customer Support** (React, Node.js, Pinecone) Jun 2024
- Engineered a production-ready e-commerce AI agent using DeepSeek, React, and Node.js to support customer service
 - Integrated Pinecone vector DB (1536-dim embeddings) enabling semantic search and compatibility checks
 - Built intelligent query preprocessing and multi-modal response generation, handling part/model number recognition, troubleshooting, and step-by-step installation guidance
 - Delivered a fully functional prototype with <3s response latency, <2% error rate, and full mobile optimization within 48 hrs
- Ekphrasis – AI Feedback Tool for Graphic Design Education** (Jupyter Notebook, HTML, Python) Aug 2024 - Jan 2025
- Designed an AI-powered interactive tool offering visual feedback to help students understand abstract design concepts
 - Conducted user research and thematic analysis with 11 educators to identify language barriers in design critique
 - Developed an Interface and a machine learning model to generate contextualized visual examples based on students' work
 - Improved learning outcomes for novice designers through real-time, visual, and context-aware design aids

Skills

Programming & Frameworks: Python, JavaScript (TypeScript), React, Node.js, Flask, Express
AI/ML & Data: LLM APIs, Prompt Engineering, CLIP, Vector Databases (Pinecone, SQLite), Docker, Git
Design & Prototyping: Figma, Adobe Creative Suite, Interaction Design, User Research, Rhino
